COGNEX

In-Sight Micro Series

Make it small. Make it smart. Make it easy.

That's what Cognex has achieved with the In-Sight Micro series vision system. In-Sight Micro packs a complete vision system into a remarkably small package that measures just 30mm x 30mm x 60mm. Powered by In-Sight Explorer software with the intuitive EasyBuilder interface, the In-Sight Micro can be used for single-point inspection tasks or for building an entire factory-wide network of vision systems.

In-Sight Micro models

Standard Resolution

Offering a range of performance choices, the In-Sight Micro models handle even the highest speed manufacturing lines in the smallest vision system footprint available.

Models:

1020, 1050, 1100, 1400

High Resolution

When large parts need to be inspected for small defects or precise measurements, turn to the high resolution models for greater accuracy.

Models:

1402, 1403, 1403C

ID

In-Sight Micro ID Readers use our unmatched identification software tools for reading and verifying 1D and 2D codes, and advanced OCR/OCV tools for reading and verifying text.

Models:

1110, 1410, 1412, 1413

Color

Includes the powerful ExtractColor software tool to inspect color features of a part and the robust MatchColor software tool to recognize parts based on their color.

Models:

1100C, 1400C, 1403C

For more information on In-Sight Micro models, please refer to page 10.

In-Sight 5000 Series

Rugged, reliable and powerful.

In-Sight 5000 series vision systems offer users the highest level of performance and are the only vision systems available that are equipped with industrial-grade features as standard. Powered by In-Sight Explorer software with the intuitive EasyBuilder interface, the In-Sight 5000 series can be used for single-point inspection tasks or for building an entire factory-wide network of vision systems.

Resolution

Available in 640 x 480, 1024 x 768, 1024 x 8192, 1600 x 1200 and 2448 x 2048 formats. Accepts standard C-mount lenses.

Connectors

Ethernet, power and I/O connect via the industrial M12 connectors.

Standard Housing

Die-cast and steel cases are IP67 (NEMA 6) rated and have a protective lens cover.

Stainless Steel Housing

IP68-rated case stands up to caustic environments.

In-Sight 5000 models

Standard Resolution

Built of rugged, die-cast aluminum, with sealed M12 connectors, and an included protective lens cover, the In-Sight 5000 Series models offer a wide array of performance choices, all with IP67 (NEMA 6) rated protection.

Models:

5100, 5400, 5600

High Resolution

When large parts need to be inspected for small defects or precise measurements, turn to the high resolution models for greater accuracy. Up to a 5MP version available.

Models:

5401, 5403, 5603, 5605

ID

In-Sight ID readers use our unmatched identification tools for reading and verifying 1D and 2D codes, and advanced OCR/OCV tools for reading and verifying text.

Models:

5110, 5410, 5411, 5413, 5610, 5613, 5614, 5615

Color

Includes the powerful ExtractColor tool to inspect color features of a part and the robust MatchColor tool to recognize parts based on their color.

Models:

5100C, 5400C

Line Scan

The In-Sight line scan builds an image line-by-line, as a product moves past the system. This alternative method for acquiring images is suited to applications such as inspecting 360° around a cylindrical object, building high quality, high resolution images, and inspecting parts on a web.

Models:

5604, 5614

High-Performance

The high-performance series offers a 1 GHz processor running the Cognex vision tool library at the highest speeds to keep up with the fastest production lines. The 5600 is available in standard, high-resolution, and line scan, for ultimate acquisition flexibility.

Models:

5600, 5603, 5604, 5605, 5610, 5613, 5614, 5615

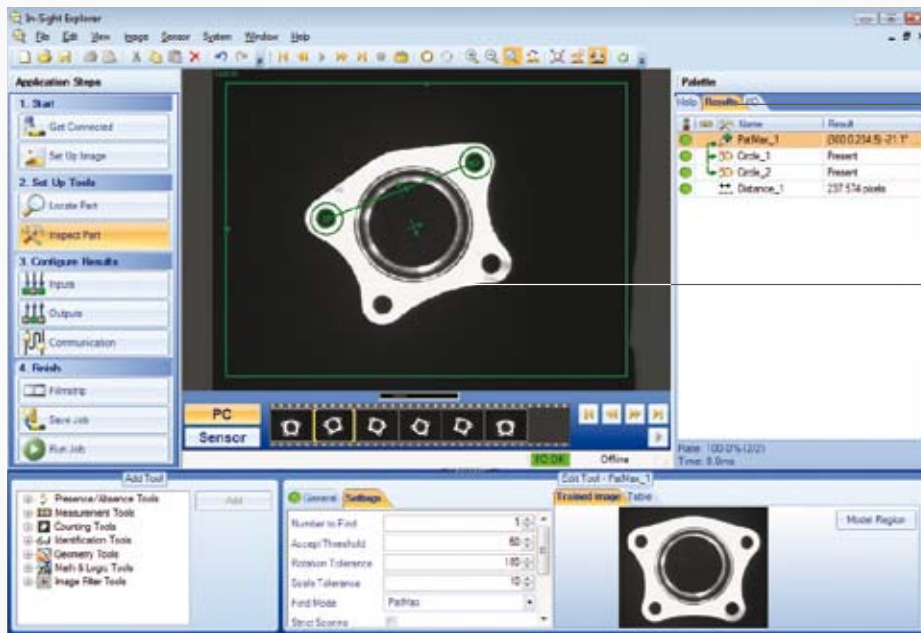

For more information on In-Sight 5000 models, please refer to page 11.

Vision Has Never Been Easier

The most powerful In-Sight vision tools are now the easiest to use and are presented more simply than ever before with the EasyBuilder interface in our In-Sight Explorer Software. This easy-to-use interface walks you through the process of setting up your vision application, step by step.

Great for first time vision users, EasyBuilder doesn't require you to learn programming, allowing you to get the application deployed and running in a very short time and enabling you to focus on what's most familiar... your part! Plus, the advanced vision tools and logic make EasyBuilder a powerful interface for the experienced vision user too!

For advanced vision users, In-Sight Explorer gives you access to the power and flexibility of the spreadsheet to allow you to program solutions for the most challenging applications.

- 1
- 2
- 3
- 4

Four simple steps guide you through the setup process.

A library of vision tools are configured with the click of a mouse.

The palette provides quick access to tool results, I/O status and built-in help.

Point-and-Click Setup Drop in tools quickly by simply clicking on the features of interest.

Intuitive, Easy to Use

Working from an image of the part, four simple steps complete the application setup:

- 1 START** Connect your In-Sight vision system on your network and set up the image to inspect.
- 2 SET UP TOOLS** Locate and inspect the part using a library of over 40 industry proven vision tools.
- 3 CONFIGURE RESULTS** Point-and-click setup for inputs, outputs, and communication to PLCs, robots and HMIs.
- 4 FINISH** Choose the images to record while inspecting, and put your In-Sight vision system online.

That's all it takes to complete an application! In a fraction of the time that you would normally spend learning how to set up a vision system, you can have your entire solution configured and deployed.

Factory Floor Communications

Integrating In-Sight vision systems into your existing automation control system is easy with Cognex Connect™, the most comprehensive suite of communications capabilities ever available in a vision system. Whether you're connecting In-Sight directly to a PLC or robot controller, or managing multiple In-Sight vision systems remotely from a networked PC or HMI, Cognex Connect assures seamless communication between In-Sight and all of your equipment on the factory floor.

- Cognex Connect supports open-standard protocols used by the leading PLC manufacturers including CC-Link, MELSEC protocol, EtherNet/IP, PROFINET, and Modbus TCP. Whether connecting to Mitsubishi, Rockwell, Siemens, or any other brand of PLC, Cognex integrates into the control system with point-and-click simplicity.
- For interfacing to robots, Cognex Connect provides pre-configured communication tools for ABB, Denso, Kawasaki, Kuka, Motoman and Staubli. Communication with Mitsubishi, Adept, Epson, IAI, Nachi, Yamaha and many other robot manufacturers is also supported.
- For interfacing to HMIs, PCs and file servers, Cognex Connect provides an OPC Server, ActiveX Display Controls, In-Sight SDK, and support for TCP/IP, FTP, SFTP, Telnet and SMTP over Ethernet.

Because Cognex Connect is built with dedicated tools, developed to exacting standards, you can be confident that solutions based on In-Sight communication technology will be highly reliable and effective. And with Cognex Connect this will be the fastest and easiest integration you have ever experienced—saving you both time and money.

MODBUS TCP

Modbus

Powerful Vision Tools

The industry-leading Cognex vision tool library provides reliable, repeatable performance in even the most challenging vision applications. Regardless of the application, In-Sight vision tools have the reliability and accuracy that is required to solve even the most difficult applications.

Tool Category	Advantages	Applications
PART LOCATION TOOLS... LOCATE PARTS IN WIDELY-VARYING CONDITIONS RELIABLY AND ACCURATELY		
	<ul style="list-style-type: none"> • PatMax, the industry's accuracy and reliability standard for part and feature location, utilizes patented geometric pattern matching technology to locate parts under difficult conditions • Simplifies mechanical fixturing and lighting, making vision projects easier and less expensive to implement 	<ul style="list-style-type: none"> • Locate automotive, electronic, pharmaceutical, and consumer parts and assemblies for inspection • Identify locations of parts for robotic handling, tolerating changes in rotation, scale, and lighting variations • Precision part alignment
INSPECTION TOOLS... VERIFY THE CORRECT ASSEMBLY OF COMPONENTS AND FIND FLAWS IN PART APPEARANCE		
	<ul style="list-style-type: none"> • Provides robust, repeatable inspection results despite changes in part orientation • Allows users to easily classify defects by defect type 	<ul style="list-style-type: none"> • Verify correct assembly of automotive parts • Verify the contents and seals of packaged goods for food, consumer, and pharmaceuticals • Inspect correct assembly of electronics
MEASUREMENT TOOLS... MEASURE CRITICAL PART DIMENSIONS AND VERIFY TOLERANCES		
	<ul style="list-style-type: none"> • Enables high-accuracy gauging of critical part dimensions despite changes in part orientation and lighting • Built-in geometry tools make complex measurements easy 	<ul style="list-style-type: none"> • Measure and verify tolerances of automotive parts, assemblies, and product labels • Measure critical tolerances of medical and surgical devices
ROBOT GUIDANCE TOOLS... ELIMINATE PART FIXTURING		
	<ul style="list-style-type: none"> • Combines part location tools with communication protocols for total guidance capability • Eliminates costly fixtures in pick-and-place applications • Allows processing multiple part types at the same robotic station 	<ul style="list-style-type: none"> • High-speed precision pick-and-place. Place or remove parts on pallets • Locate unfixtured parts on conveyor, and place them in package • Use robot to manipulate part or camera to inspect critical features of part
FLEXIBLE FLAW DETECTION... FIND EDGE AND SURFACE DEFECTS		
	<ul style="list-style-type: none"> • Ability to flex • Allows for process variations reducing false defects • Ignores defect during run time • False defects can be ignored and can be added to the mask 	<ul style="list-style-type: none"> • Edge-based and surface (area) based inspection in one tool • Find edge and surface defects • Find boundary defects – conformity of shape • Find surface defects – stains and scratches • Find print inspection – silk screen logos

Tool Category	Advantages	Applications
INSPECT EDGE TOOL		
	<ul style="list-style-type: none"> • Provides robust, repeatable inspection results despite changes in part orientation • Allows users to easily classify defects by defect type controlling thresholds that define a defect • Works on straight or circular parts • Determines min/max deviations and widths • Helps to find gaps in addition to defects 	<ul style="list-style-type: none"> • Verify the correct assembly of components and find flaws in part appearance • Find deviations in edge position and defects and gaps with position and width • Find width variations or missing beads along the bead path in bead tracking applications
COLOR VISION TOOLS... INSPECT AND IDENTIFY PARTS BASED ON COLOR		
	<ul style="list-style-type: none"> • The powerful ExtractColor tool learns simple or complex colors for color based inspection, location, and identification applications • 24-bit resolution MatchColor tool reliably distinguishes between even subtle shade differences • Point-and-click color training with simple adjustments make color application development easy • External retraining enables color retraining on the factory floor without a PC 	<ul style="list-style-type: none"> • Identify and sort products based on their color • Monitor part color to ensure consistent quality • Identify labels to ensure proper labeling of products • Verify assembly of products based on the colors of components • Inspect pharmaceutical blisterpack for the correct color tablets • Verify color and proper assembly of LEDs
ADVANCED OCV/OCR TOOLS... VERIFY AND READ ALPHANUMERIC TEXT STRINGS		
	<ul style="list-style-type: none"> • Handles low-contrast characters, as well as confusing or unevenly-spaced characters • Inspection speeds of faster than 1ms per character • Font editor improves the readability of poorly-trained fonts or degraded characters 	<ul style="list-style-type: none"> • Read or verify date/lot codes and SKUs of food and beverage, pharmaceutical, and consumer items • Verify character legibility and proper printer operation • Read direct-marked numbers and characters on automotive components
INDUSTRIAL CODE READING TOOLS... RELIABLY READ 1D AND 2D CODES ON LABELS OR DIRECTLY MARKED ON PARTS		
	<ul style="list-style-type: none"> • 1DMax™ is a fast, accurate, best-in-class 1D barcode-reading tool • 2DMax™ handles low-contrast, poorly formed 2D codes resulting from process degradation and marking techniques such as dot peen and laser etch • Reads up to 7200 parts per minute 	<ul style="list-style-type: none"> • Read direct-marked 2D codes on automotive, aerospace, and pharmaceutical parts • Read and track 1D and 2D codes, and verify print quality to industry standards for consumer, food, beverage, and pharmaceutical products
NON-LINEAR CALIBRATION FOR THE MOST ACCURATE RESULTS		
	<ul style="list-style-type: none"> • Non-Linear Calibration improves accuracy and repeatability by correcting lens and perspective distortion • Step-by-step wizard makes calibration simple, guiding users through the process of turning pixels into robot or real world coordinates • Maintain accuracy even when the vision system is mounted off-axis 	<ul style="list-style-type: none"> • High-accuracy robotic pick-and-place for standard mounting and off-axis mounting due to space constraints or robot motion constraints • High-accuracy dimensions of critical measurements of medical devices

A Full Range of Accessories

To simplify and complete system integration, Cognex offers a variety of optional accessories designed specifically for use with In-Sight vision systems.

Lighting

LED array provides economical bright light for many applications.

In order to achieve the highest quality images possible, Cognex offers a wide array of lighting accessories. When basic lighting works for the application, integrated ring lights are ideal for In-Sight vision systems. Easily mounted directly to the vision system, these lights provide basic front lighting without having to purchase and install a separate light. Integrated ring lights are available in red LEDs, red diffuse LEDs, and white LEDs.

Lenses

Cognex offers a full range of high-quality compact lenses designed specifically for machine vision applications.

And, for In-Sight ID models, image formation systems are available in seven different lens focal lengths.

Cables

In-Sight cables provide superior performance with rugged, stainless steel M12 connectors and are rated for ten million linear and thirty thousand torsional flex cycles... ideal for robot-mounted applications.

VisionView Operator Interface

VisionView operator interface is ideal for monitoring and controlling vision systems and industrial ID readers on the factory floor, and allows operator controls specific to the application. Available in multiple platform options.

I/O Modules

In-Sight I/O modules are designed to simplify connections and expand the I/O capabilities of In-Sight vision systems.

They allow easy access to power, acquisition triggers, and light strobe, and provide convenient general-purpose input and output wiring. Rugged quick-connect cables ensure reliable connections to the In-Sight vision system.

Additionally, I/O modules provide an RS-232 communications port for serial devices.

Your Cognex sales engineer or certified Cognex partner can provide information on these and other accessories that enhance In-Sight vision systems.

In-Sight Fixed-Mount ID Readers

Cognex In-Sight fixed-mount ID readers provide unmatched code reading performance. These readers integrate lighting, camera, ID software, processor and communications into an industrial-grade design, making them the most versatile and rugged fixed-mount readers available today.

In-Sight ID readers incorporate IDMax[®], breakthrough code-reading software based on the patented Cognex PatMax technology, through 1DMax[™] and 2DMax[™] algorithms. IDMax can read 1D code symbologies such as UPC, PDF, stacked and postal codes, 2D code symbologies such as Data Matrix and QR, or a mix of barcode and 2D codes simultaneously.

1DMax is a best-in-class 1D barcode-reading tool optimized for omnidirectional barcode reading and can handle extreme variations in contrast, blur, damage, voids, specularity, resolution, quiet zone violations and perspective distortion.

2DMax is optimized for reading QR codes and handles a wide range of degradations to 2D Data Matrix code appearance that result from dramatic degradations in Direct Part Marking (DPM) code quality due to differences in material types and surfaces. 2D Data Matrix code reading in DPM applications is an increasingly important part of manufacturing processes. An unreadable code may stop production, and can result in the part not being processed correctly.

Models

In-Sight Micro Series: 1110, 1410, 1412, 1413

In-Sight 5000 Series: 5110, 5410, 5411, 5413, 5610, 5613, 5614, 5615

Fast, Reliable Code Reading

Industrial identification is very challenging due to variations in mark appearance, uncertainty of part position and high production line speeds. The combination of sensor, processor architecture and optimized ID software, allows In-Sight fixed-mount readers to meet high-speed production requirements, while maintaining accurate reading.

Advantages

- Real-time reading of 1D and 2D codes at rates over 7200ppm
- Includes IDMax – the industry's most reliable Data Matrix reading software
- Industry-standard mark quality assessment metrics for 1D and 2D codes
- Fast setup, plus reliable, robust operation

In-Sight Model Comparison

In-Sight Micro Series

Model ¹	Speed Rating ²	Acquisition ³ (fps)	Color Model	Available in Stainless Steel	Resolution					User Interface		Supported Tools ⁴					Part Number
					640 x 480	1024 x 768	1280 x 1024	1600 x 1200	1K Line Scan	EasyBuilder	Spreadsheet	Essential Tools	Extended Tools	ID Tools	Color Tools	PatMax Available	
1020	1x	60			•					•		E					ISM1020-01
1050	1x	60			•					•	•	E					ISM1050-01
1100	4x	60			•					•	•	E	X	I		P	ISM1100-01 ISM1100-11 (PatMax)

1413	8x	14					•			•	•			I			ISM1413-01

Notes:

- 1) All In-Sight vision systems have an input trigger and 2 high speed outputs built in. I/O modules are available for additional I/O on all In-Sight systems.
- 2) Speed rating compared to In-Sight Micro 1020 model and does not include image acquisition rate. The 5604 and 5614 models have acquisition speed rated in lines per second.
- 3) Acquisition rate is based on minimum exposure, and a full image frame capture.
- 4) Supported Tools:
 - E** Essential Tool Set includes blob, edge, curve and line finding, histogram and geometry tools, image filters, pattern matching, and standard calibration.
 - X** Extended Tool Set includes non-linear calibration and caliper tool. PatMax option available.
 - I** ID tool set includes: 1D/2D barcode reading and verification, text reading and verification (OCR/OCV) and image filters.
 - C** Color tool set includes MatchColor, ExtractColor, color histogram, color to greyscale filters and color to greyscale distance filter.

In-Sight... for All Applications

Inspect

Cognex In-Sight vision systems help companies reduce scrap and re-work—which ultimately saves time and money—by inspecting products throughout the manufacturing process.

Industries from pharmaceutical to automotive to electronics rely on Cognex vision systems to ensure the end products they deliver to their customers meet the highest standards.

Guide

In-Sight vision systems are widely used with material handling systems and robots for general alignment and pick-and-place guidance in assembly and inspection applications with speed and accuracy, eliminating the need for expensive fixturing and enabling a new generation of flexible manufacturing.

The power of our patented PatMax® geometric pattern finding tool and the support for many robot controller protocols makes integrating In-Sight vision systems into robotic applications faster and easier.

Identify

Whether identifying parts using barcodes, alphanumeric characters, or by shape or color, Cognex In-Sight vision systems reliably and accurately identify parts, even on the fastest production lines.

In-Sight vision systems provide unmatched 1D and 2D code reading performance and handle a wide range of degradation to the appearance of the code with the industry's most reliable read rates. Our powerful OCR tool reads text strings, even under varying conditions such as rotation, uneven lighting and confusing scenes. And, our advanced color recognition tools can reliably distinguish between similar colors with high precision.

COGNEX Companies around the world rely on Cognex vision and ID to optimize quality, drive down costs and control traceability.
